

What are the spec's on the 2004 Pontiac GTO?

You can get most of the details at www.pontiac.com/gto – but it's a RWD V8. It is built in Australia and imported to the US. It is very similar – with some differences – to the RHD Holden Monaro sold in Australia and a LHD Lumina that is sold in Asia and the Middle East. It has the LS1 that comes standard in most Corvettes – as well as the V8 f-bodies (Camaros and Trans Ams) from 1998 on. It's 5.7 liters – rated at 350 hp / 365 ft.lb's of torque. This seems to be an actual rating and not underrated like the f-bodies are. The current deal to import the GTO is limited to 18,000 [cars](#) per year for 3 years (MY 2004-2006). Speculation is '05 gets hood scoops, dual exhaust outlet and LS2 standard. Probably still not much options.

[Official Spec Sheet Click Here](#)

What are the stock wheel specs?

Bolt Pattern - **5x120.0mm**

Offset - **+48mm**

Hub Diameter - **69.6mm**

What are the options available for the GTO?

You can get a 4 speed automatic or for \$695 you can get the Tremec 6 speed manual. The A4 gets the gas guzzler tax so is actually more expensive.

There are 7 color options – six with multiple interior color options:

- Phantom Black Metallic – black or red leather
- Torrid Red – black or red leather
- Quicksilver Metallic – black or red leather
- Impulse Blue Metallic – black or blue leather
- Barbados Blue Metallic – black leather
- Cosmos Purple – purple leather
- Yellow Jacket – black leather

Everything else is standard. Power locks and windows, AC, Blaupunkt 200W 10-speaker sound system, leather buckets front and rear, P245/45 ZR17 W-rated performance [tires](#) are some highlights.

What are the performance numbers for the GTO?

Pontiac quotes 0-60 mph in 5.3s for the M6 and 5.4s for the A4.

SLP that makes performance upgrades has turned a 13.14s @ 106.97 ¼ mile with a bone stock M6 GTO.

Some time has passed, this FAQ was first written before most people even had their GTO's let alone raced them. A good bolt-on/tuned 04 GTO can run high 12's. Auto's are faster than the manual trans cars which suffer more from wheel hop at launch. We have seen stock chassis GTO's already in the 9's. Hopefully as time goes along we can get past the IRS hurdle and have a ton of 11 second naturally aspirated GTOs out there.

Does the GTO come with the LS6 block?

Yes. At this point, they don't appear to be casting the original LS1 blocks anymore. The GTO has the LS6 block and intake manifold, with the LS1 heads and cam. There is some debate whether the cam is identical as the 'vettes and f-bodies. At this point, any printed information I've found shows them identical, but that may not be the case.

Does the GTO have a true dual exhaust and why does it only exit on one side then?

The GTO indeed has a true dual system – with no crossover pipe. The pictures appear to have a crossover, but it is solid and no gases pass through. The general consensus is that the time for design of the GTO from the Monaro did not allow dual exits – or Pontiac didn't realize how much affect this has on some muscleheads.

*Note - The VY Monaro's fuel tank location does not allow room for a passenger side exit tail pipe

*Note - Pontiac updated the [exhaust](#) in 2005, and Holden now uses the GTO style gas tank and exhaust on the 2005/2006 VZ Monaro
